

H9

HISPANIC OR LATINO ORIGIN OF HOUSEHOLDERS BY TOTAL RACES TALLIED
Universe: Total races tallied for householders in occupied housing units
2010 Census Summary File 1

NOTE: For information on confidentiality protection, nonsampling error, and definitions, see <http://www.census.gov/prod/cen2010/doc/sf1.pdf>.

	Middletown city, Connecticut
Total races tallied for householders:	20,264
Total races tallied for Not Hispanic or Latino householders:	19,060
White alone or in combination with one or more other races	15,588
Black or African American alone or in combination with one or more other races	2,462
American Indian and Alaska Native alone or in combination with one or more other races	143
Asian alone or in combination with one or more other races	795
Native Hawaiian and Other Pacific Islander alone or in combination with one or more other races	18
Some Other Race alone or in combination with one or more other races	54
Total races tallied for Hispanic or Latino householders:	1,204
White alone or in combination with one or more other races	640
Black or African American alone or in combination with one or more other races	106
American Indian and Alaska Native alone or in combination with one or more other races	31
Asian alone or in combination with one or more other races	13
Native Hawaiian and Other Pacific Islander alone or in combination with one or more other races	3
Some Other Race alone or in combination with one or more other races	411

NOTE: The alone or in combination categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. For example, a respondent who indicated "White **and** Black or African American" was counted in the White alone or in combination category as well as in the Black or African American alone or in combination category. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses), which exceeds the total number of householders.
