NOTE 1: The numbers by detailed Asian groups do not add to the total population. This is because the detailed Asian groups are tallies of the number of Asian *responses* rather than the number of Asian *respondents*. Responses that include more than one race and/or Asian group are counted several times. For example, a respondent reporting "Korean, Filipino, **and** Black or African American" would be included in the Korean as well as the Filipino numbers. "Specified" includes the remaining Other Asian write-in responses that were not tallied into separate groups in the table. "Not specified" includes respondents who checked the Other Asian response category on the census questionnaire and did not write in a specific group or wrote in a generic term such as "Asian" or "Asiatic."
