Re: Public Hearing Transcript on 2/27/85

The Public Hearing for the Planning and Zoning Commission cannot be transcribed as there was a failure in the recording system. None of the tapes recorded any part of the meeting.

We called Dictaphone for repair and was told that there was a loose wire in the Council Chamber hook up. It has now been repaired.

The signal system in the Dictaphone that alerts us that the recording is not working also failed because of the loose connection in the wires.

Some of the items on the Public Hearing have been decided. No transcript can be made for the proposals about which a decision has not been made.
